X Type Folding Looms — Four & Eight Harness

36 in. Eight-harness (illustrated)	Price \$95.00
45 in. Eight-harness	Price 105.00
36 in. Four-harness	Price 65.00
45 in. Four-harness	Price 72.50

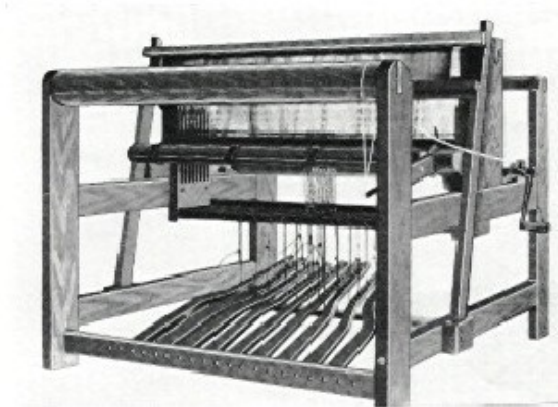

This loom is constructed of hardwood and is nicely finished. The harnesses are operated by jacks from below and the overall height does not exceed 37 inches. The distance from front to back in all models is 43 inches.

When folded the loom can be taken through an ordinary door and is shipped full set up.

Shipping weight (four-harness) about 200 lbs.

Equipment: Sectional warp beam; one reed 15 dent; one throw shuttle; tie-up cord; 15 heddles per inch of reed, flat steel rust-proof; two heddle transfer rods.

Rigid Type Looms — Non Folding

36 in. Eight-harness (illustrated)	Price \$105.00
36 in. Four-harness	Price 70.00
45 in. Eight-harness	Price 115.00
45 in. Four-harness	Price 75.00

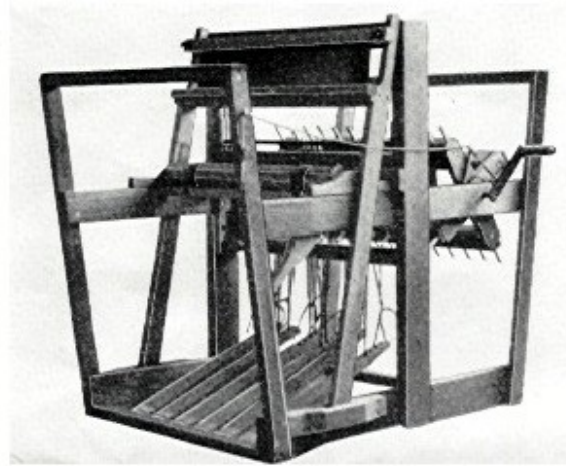

This type may be had with any desired number of harnesses, four, eight, ten or twelve.

It is made in the two above widths only.

This loom operates in the same manner as the others illustrated but is much heavier and more rigid than the folding type.

Equipment same as that listed under folding looms.

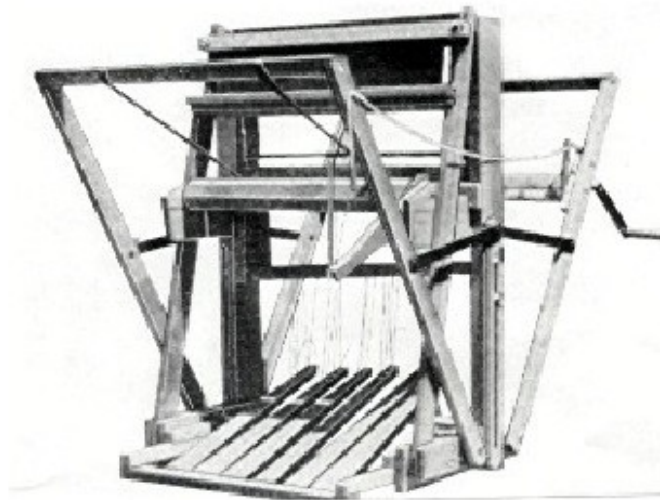

22 Inch Four Harness Loom

This rigid model illustrated above is priced at only \$42.50. It is made entirely of hardwood. It is 28 inches wide and 43 inches deep. Fully equipped with sectional warp beam; one throw shuttle; one reed 15 dent; tie-up cord; 330 flat steel heddles; two heddle transfer rods. Shipped fully set up. Shipping weight about 120 lbs.

This is a jack-type loom, is easy to operate and is well balanced with a deep shed.

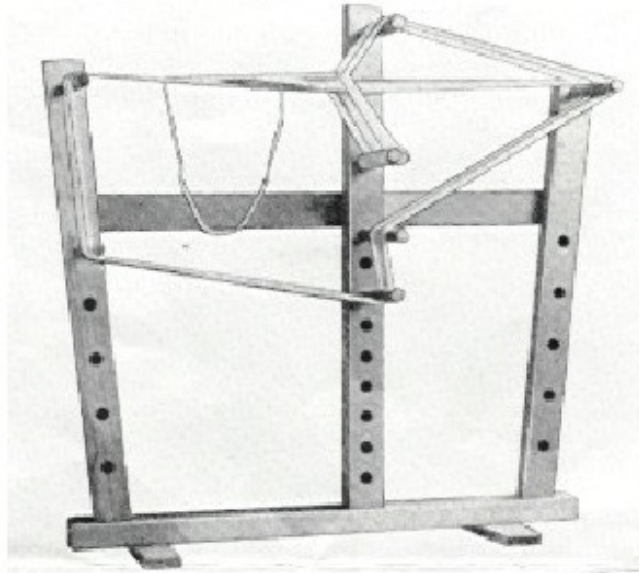

22 Inch Folding Loom

This model is priced at \$45.00

Folds to space 17 inches thick and only 33 inches high. Is an ideal loom for apartments and summer cottages. Is easy to move about. The weight is about 30 lbs. Equipped with a plain warp beam, other equipment as listed for 22 inch Four Harness Loom on proceeding page.

If desired this model may be had with sectional warp beam.

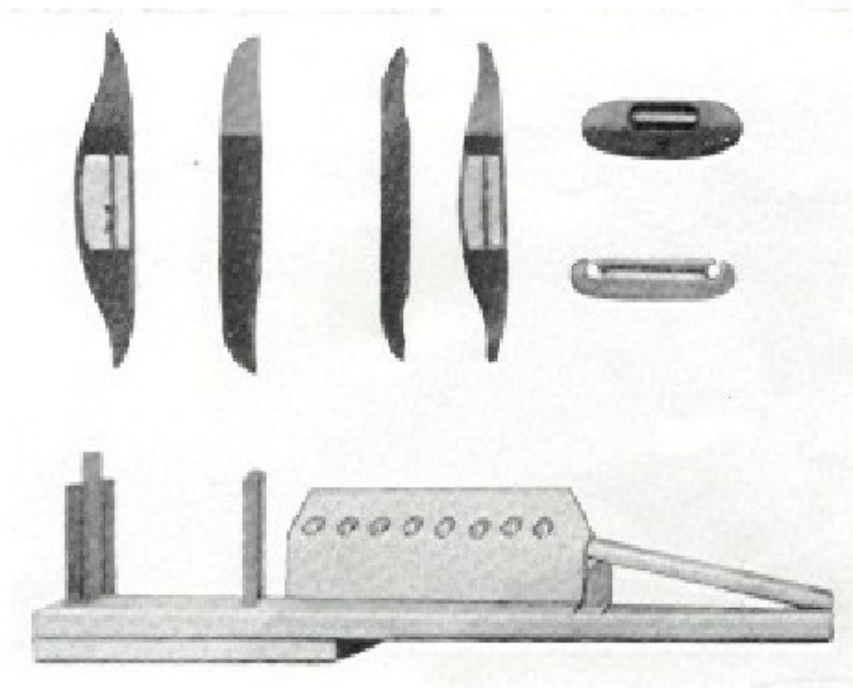

Inkle Loom Price \$6.00

Ideal for weaving belts and other narrow fabrics -- produces a warp faced weave.

Equipped with one belt shuttle, 100 tied linen heddles and directions for using.

Shipped K. D. Weight 9 lbs.

Maple Throw Shuttles	\$1.50
Belt Shuttle (Norwegian)50
Gardner Warp Tensioner (for sectional warping)	3.50
Sectional Lease Crow Attachment	1.25
Spool Rack, capacity 60 spools	5.00
Flat Steel Heddles, rust-proof, per hundred75

The construction of these looms eliminates the necessity of ever adjusting the harness frames for height. The only ties being from the treadles to the lamms. The harnesses are raised with a PATENTED coupler and they always fall to rest at the proper level.

The nine inch heddles give sufficient shed for all types of weaving. The beater is equipped with shuttle race.

The harnesses are equipped with the very best hardware as: lock hook center support; spring steel end bars; tempered steel hedde rods; flat steel heddles non-rusting.

Sectional warp beams standard equipment on all models, but plain beams may be had if preferred.
